DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 4/1, 4/3, 5/4/1, 5/4/3 are rejected under 35 U.S.C. 102(b) as being anticipated by either Eckardt or Okabe. Applicant claims an outer cutter for a reciprocating shaver having integral end walls for blocking hair from being discharged. This is clearly shown by Eckardt as part 21. The foil top of Okabe shows integral end walls and a curved upper portion as well. The forming method claimed apparently implies no specific structure and therefor does not limit it. Regarding claim 4 the devices are functioning razors with support frames.

Claims 1-3, 4/2, 5/4/2 are rejected under 35 U.S.C. 102(b) as being anticipated by Loner. Note that Loner shows an outer cutter that has integral end walls as claimed. It is well known (inherent) in the art and as apparently shown by the instant reference to specify a thin foil upper curved portion with apertures and end walls that are structurally thicker than the foil top for typical dry shavers for the face. Thus the language of claim 2 is met.
